

Daniel Jeremiah G. Baguio

Metro Manila, Philippines | +63 956 019 1110 | work.danielbaguio@gmail.com

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 2 years of experience building and enhancing production web applications using C#, .NET, and JavaScript. Experienced across the full SDLC, from backend services and REST APIs to frontend development, CI/CD pipelines, and production support. Hands-on track record integrating external APIs into customer-facing features, building reusable UI components, and actively using AI-assisted development tools to accelerate delivery and improve software quality.

WORK EXPERIENCE

Amdocs Philippines Inc. | Pasig City | Hybrid

Software Engineer

February 2025 – February 2026

- Built a QR-based self-registration flow (ASP.NET MVC) for a Philippine telecom client, automating profile population via internal APIs and reducing manual data entry for field operations.
- Developed an address resolution tool integrating Google Maps Geocoding API to capture accurate coordinates and reduce field installation errors across service locations.
- Designed and delivered end-to-end full-stack features using .NET, C#, SQL, and JavaScript, improving user productivity and streamlining daily operations.
- Executed 5 production deployments with post-deployment support spanning up to 6 months, coordinating across 4 cross-functional project teams.

Junior Software Engineer

June 2024 – January 2025

- Contributed to system stability and performance through structured testing and debugging in simulated VM environments, reducing discrepancies and downtime.
- Supported backend development using .NET, C#, and SQL, continuously aligning technical implementations with evolving business requirements.

Able Phils Retail Corporation | Remote | Freelance

Shopify Developer

August 2025 – February 2026

- Translated design mockups into fully responsive Shopify themes using Liquid, HTML, CSS, and JavaScript, ensuring cross-device compatibility.
- Built custom features and reusable UI components that improved store usability and increased conversion rates.
- Optimized site performance and integrated third-party apps (e.g., Bundler, Microsoft Clarity) to support data-driven merchandising workflows.

I-Bridge Systems Philippines Inc. | Pasig City | Internship

Website Developer

August 2022 – November 2022

- Modernized legacy systems by improving UI structure and backend code readability, and authored technical documentation to support knowledge transfer.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET Framework, JavaScript, Python, Java, PHP, Liquid, HTML, CSS

Frontend & Web: React, Responsive Design, Shopify Theme Development, Frontend UI Architecture

DevOps & Tools: Git, REST APIs, CI/CD Pipelines, AWS, Virtual Machines, Visual Studio

Practices: Full SDLC, System Design, Performance Optimization, Code Maintainability, AI-Assisted Development, Agile/Scrum

EDUCATION

De La Salle University

October 2023

BS Computer Science, Specialization in Software Technology

- Most Outstanding Thesis Award | Consistent Dean's Lister | Gawad Lasalyano Service Merit Award
- Thesis: Developed a 2D Roguelike Serious Game for Learning Philippine Mythical Creatures, leading the interaction system design and a quiz-based combat engine with integrated educational content.
